

BTC Operating System Weekly Close Checklist

Version v1.0.6

Use at the close

The job at weekly close is not to predict. It is to compare the confirmed dashboard state with the written playbook you already decided to follow.

Indicator page: AZRO Systems — BTC Operating System (Invite-Only)

Product / access page: AZRO Systems pricing + Gumroad

Support: support@azrosystems.com

Chart and data health

	Checklist item
[]	BTC chart is on the supported 1W host with regular candles. Prefer INDEX:BTCUSD when it is available.
[]	The indicator is loaded with the intended chapter settings.
[]	No unresolved SET TF, SET SYMBOL, CHECK FEED, START: FUTURE, DATA: LIMITED, or persistent STATUS: SAFE warning is being ignored.
[]	Live alerts, if used, still match the active chart and current settings.

Dashboard review

	Checklist item
[]	ACTION and the suggested amount have been read on the confirmed weekly close.
[]	Mode, Risk level, Weekly budget, Cash at Start date, and Start date still match the written policy.
[]	AZRO BTC-eq versus Auto BTC-eq and the extra sats delta have been reviewed as accountability, not as emotion bait.

Execution and recordkeeping

	Checklist item
<input type="checkbox"/>	Buy / Hold / Trim decision was executed exactly as written, or the override was logged immediately.
<input type="checkbox"/>	Companion Tracker updated with the week, any overrides, and any one-time cash events.
<input type="checkbox"/>	Custody, transfer, and cash handling for long-term BTC are clear before next week begins.
